

STEWARDSHIP FOR EARLY-SUCCESSIONAL HABITAT BIRDS WITHIN MINNESOTA'S FORESTED REGIONS

The Sustainable Forests Education Cooperative is teaming up with the Minnesota DNR, US Fish & Wildlife Service and Wildlife Management Institute to educate professional land practitioners about sharp-tailed grouse, American woodcock, and golden-winged warblers' habitat needs as well as identify opportunities to design and implement habitat management activities.

An afternoon field tour will feature "on the ground" examples of management aimed at benefitting these bird species.

DATE: Wednesday, May 5, 2010
TIME: 9:00 am - 4:00 pm
PLACE: UMN, Cloquet Forestry Center
COST: \$65 SFEC Members / \$135 Non-Members
(includes lunch)
